EDUCATION

Creighton University - Bachelor of Science in Psychology and Computer Science

Graduated May 2026

Research Profile: Early-career researcher and developer focused on human-centered AI for healthcare. Interests include retrieval-augmented generation, clinical decision support, biomedical machine learning, and translating complex AI systems into accessible patient- and clinician-facing tools.

RESEARCH & TECHNICAL EXPERIENCE

Creighton University Nursing Research Lab – Student Research Assistant

May 2026 - Present

- Support development of P3 Myeloma, a web-based AI-enhanced shared decision-making resource for adults with relapsed or refractory multiple myeloma.
- Translate clinical research, informed-consent, accessibility, participant-engagement, and privacy requirements into patient-facing digital workflows.
- Evaluate approaches for consent-first onboarding, authentication, email verification, returning-user access, and future participant-engagement tracking.
- Collaborate with faculty researchers and project stakeholders to prepare the platform for pilot testing and integration of an AI decision-support tool.

Creighton4Good – Student Intern

February 2026 - Present

- Collaborate on development of BlueJay Bites, a campus app designed to reduce food waste by connecting students with leftover food from university events.
- Evaluate prior application prototypes to identify reusable functionality and define requirements for a minimum viable product, including active event listings, location, descriptions, and serving information.
- Develop user stories, break features into actionable tasks, and organize project work through GitHub Projects and weekly scrum meetings.
- Contribute to planning for frontend architecture, authentication, hosting, and user-facing event workflows using React Native/Expo and Spring Boot.

Creighton University Undergraduate Research Lab – Student Research Assistant

January 2024 - January 2026

- Conducted behavioral neuroscience research examining the antinociceptive effects of morphine:ketamine mixtures in female rats.
- Contributed to experimental data collection, organization, analysis, interpretation, and presentation of findings.
- Coauthored and presented research at regional and national psychology and neuroscience conferences.
- Communicated experimental findings to academic audiences through poster and oral presentations.

SELECTED PRESENTATIONS & RESEARCH OUTPUTS

- **Germinario, E., Olusanya, J., Srinivas, P., Kondikoppa, P., Shete, S., & Fernandes, S. (2026). *Activation Editing for Low-Resource Cross-Lingual Machine Translation: Does JoLA Transfer?* International Conference on Machine Learning (ICML), Seoul, South Korea. *Upcoming presentation.***
- **Germinario, E., Viereck, A., Iverson, L., & Fernandes, S. (2026). *AI Enhanced Clinical Pharmacology: Building Smarter Prescribers Through Interactive, Lifespan Centered Learning.* Symposium on Data and Science & Statistics, Milwaukee, WI.**
- **Germinario, E., Viereck, A., Iverson, L., & Fernandes, S. (2026). *Retrieval-Augmented Generation Based Clinical Pharmacology Chatbot.* Nebraska Academy of Science, Lincoln, NE.**
- **Germinario, E., Dhuler, A., Nielsen, I., Krudwig, C., Kleffner, A., & Fernandes, F. (2026). *Detecting Cochlear Hair Cells Using Jetstream2.* Creighton University Research Week, Omaha, NE.**
- **Additional Research Presentations:** Behavioral neuroscience research on opioid analgesia, withdrawal, and substance-use models presented at the Midwestern Psychological Association and Nebraska Academy of Science, 2025–2026.

TECHNICAL SKILLS

- **Programming:** JavaScript/TypeScript, HTML/CSS, Java, Python

- **Development:** React Native, Expo, Git, GitHub, Spring Boot
- **Research & Product:** Retrieval-augmented generation, AI-supported clinical education, user-story development, Agile collaboration, usability and workflow design, experimental data collection and analysis

ADDITIONAL EXPERIENCE

Warren LLP – Summer Legal Intern

Summer 2023, 2025

- Reviewed and analyzed hundreds of pages of technical schematics, network diagrams, and product-design materials in a trade secret dispute involving networking hardware.
- Conducted legal, technical, and prior-art research to support intellectual property litigation and prepare concise analyses for attorney review.
- Drafted and proofread litigation documents and organized exhibits, deposition materials, and evidence for discovery and trial preparation.

Creighton Community Foundation – Community Health Worker Intern

May 2024 - June 2025

- Connected underserved individuals and families with food, housing, and healthcare resources.

Quality Living, Inc. – Certified Nursing Assistant

January 2025 - May 2025

- Assisted patients recovering from brain and spinal cord injuries with daily living activities.
